ABOUT ME

A motivated 3D specialist focused on games development and immersive environments, with experience delivering 3D work for high-profile branded titles including Adidas, H&M, L'Oreal and NASCAR. I balance creative ambition with technical rigour, and work across the technical side too — scripting in Lua for Roblox, developing in C# for Unity and contributing custom tooling that streamlines production.

CORE SKILLS

- 3D modelling and texturing
- Environment and prop design
- Character rigging and animation
- Blender, Maya, Photoshop and Substance Painter
- Lua scripting (Roblox) and C# (Unity)
- Collaborative teamwork and client communication

PROFESSIONAL EXPERIENCE

3D Artist | 2022–Present
Dubit Ltd.

Designing and shipping performance-conscious 3D assets and environments for major branded games at pace. Within Dubit's agile workflow I contribute end-to-end — from blockouts and level design through to final asset creation and optimisation.

- Design and model performant assets that meet the strict technical requirements of the Roblox engine, across 5 full-cycle titles spanning pre-production to live service.
- Translate concepts and moodboards into fully realised worlds and 3D assets that match brand briefs.
- Create high-quality textures and materials that elevate game aesthetics and reinforce visual identity.
- Partner closely with Game Designers to ensure assets and environments align with gameplay mechanics.
- Develop and contribute to custom tooling and scripts to improve operational efficiency across the team.

Unity Developer | Summer 2021
Manchester School of Art (Paid Student Project)

Self-taught Unity/C# to lead delivery of a cross-platform campus app — students scan tags to surface contextual information. Chose Unity over the proposed iOS-only Adobe AR tool to broaden device support.

Online Tutor | 2020–2022
Firetech UK

Tutored children aged 7–16 in subjects including game development and music production, breaking down technical concepts into accessible, age-appropriate lessons.

EDUCATION

Manchester School of Art | 2019–2022
BA (Hons) Animation for TV and Film — High 2:1

Staffordshire University | 2017–2019
BA Game Design — transferred to Animation at Manchester School of Art

Huddersfield New College | 2015–2017
Level 3 BTEC in Games Development — DDM
